

KINESIOLOGY PRACTICUM DESCRIPTION

Practicum Position Title: Exercise Instructor for Research Study

Agency/Company: [Brain in Motion II Study](#)

Location: Cumming School of Medicine (UCalgary, Foothills Campus) and Faculty of Kinesiology (UCalgary, Main Campus).

Terms Available: Winter

Number of Positions: 2

Specified Schedule: TBD. Exercise session will occur 3 times a week for approximately 1.5 hours each.

Project Duties/Responsibilities:

The *Brain in Motion II Study* is a CIHR-funded project that investigates the effects of regular exercise on cerebrovascular reserve and cognition in older adults at risk for Alzheimer's or dementia. The *Brain in Motion II Study* has recruited women and men ages 50-80 years to participate in an 18-month randomized control trial. Throughout the 18 months, participants partake in a series of physiological tests including VO₂max testing, cerebrovascular flow measurements, fasting blood work and cognitive function assessments. During the 18-months, participants are randomized to one of two 6-month exercise interventions. These exercise programs are three days a week and consists of either walking/running on a track or exercising with resistance bands.

Successful practicum students will meet their hours by directly assisting with all aspects of the exercise intervention under supervision of the exercise trainer, including set-up/take-down, providing directions & modifications to participants, and ensuring proper data collection and entry. They will attend a practicum orientation meeting during which background information on the study design and goals and emergency procedures will be covered. Practicum students will be requested to review documents detailing the study purpose and protocols as well as the specifics of the exercise programs.

Under the Supervision of the BIM II Exercise Trainer(s), the practicum student will:

Assist with aerobic or stretching and toning exercise sessions by:

- Assisting with running group exercise sessions for older adults who may have a variety of health conditions.
- Assisting with equipment set-up and clean-up before and after exercise sessions.
- Observing exercise sessions and, under guidance of the trainer, provide demonstrations for exercise, learn important exercise cues and modifications, and progress toward leading warm-up and stretching routines during the first half of the practicum.
- Motivating and engaging with participants during exercise sessions.
- Ensuring participants complete exercise sessions and fill out forms properly to ensure data quality.
- Leading participants through warm-ups, program exercises, and stretching during the latter half of the practicum. Responsibilities will include explaining exercises, providing a variety of cues, monitoring and correcting form where necessary, and providing recommendations for maintaining the required exercise intensity as needed.

- Providing individualized exercise modifications or recommend alternatives for participants with musculoskeletal limitations when appropriate and within scope of knowledge.

Assist with data entry & management from exercise sessions by:

- Becoming familiar with Polar Team 2 software: learn how to check over, download and export heart rate data from exercise sessions and how to troubleshoot technological problems.
- Assisting with inputting data into study database (will help develop Microsoft Excel skills).
- Communicating with the head trainer/study coordinator to ensure data quality.

Observe VO₂max testing, cerebrovascular flow measurements, fasting blood work and cognitive function assessments

- If time permits, students may have the opportunity to observe the above-mentioned tests. This practicum isn't focused on training practicum students to do the testing, but if practicum students are interested, efforts will be made to accommodate practicum students' requests based on testing schedule and the practicum students' availability.

Areas the student will develop in this practicum:

- Broader knowledge base of exercise instruction for clinical and healthy populations.
- Improved knowledge of chronic conditions and necessary exercise modifications.
- Practical, hands-on skills in exercise instruction and cuing, taking initiative in demonstrating and correcting technique.
- Client interaction and interpersonal skills.

Required Student Qualifications:

- Completion of KNES 203 (Activity: Health, Fitness and Performance)
- Completion of KNES 373 (Exercise Physiology)
- Personable and highly motivated; interested in working with older adults in a research-related setting
- Good communication and interpersonal skills

Assets:

- Personal Training or Group Fitness certification / experience an asset

On-Site Supervisor: Dr. Marc Poulin, poulin@ucalgary.ca and Chelsea Ziegler, bimstudy@ucalgary.ca

Kinesiology Practicum Application

Placement: [Brain in Motion II Study](#)

Students must have 60 units completed to qualify for a practicum, including 30 units of KNES
Students may participate in up to three practicums, with no more than two at the same location

Submit together to
knespracticum@ucalgary.ca:
 Completed Practicum Application
 Confidentiality Agreement

INSTRUCTIONS

1. Contact the on-site supervisor to arrange an interview.
2. Bring a copy of this application with the completed student portion to your interview to be completed by the On-Site Supervisor.
3. Submit application and required documentation (if applicable) to knespracticum@ucalgary.ca; our office will email your @ucalgary address within 5 business days with next steps for you and your On-Site Supervisor.
